

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Highport Marina

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During Winter Storm Uri (February 13 through February 28, 2021), we did not monitor or test for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done?

- Once water thawed from Winter Storm Uri and was available and accessible, we began testing water again;
- Issued a Boil Water Notice for February 13-17, 2021; and
- TCEQ took water samples on February 9 and in May 2021.

For more information, contact Eric B. Hatten, WO0046950, at 903.786.7000 or write him at Highport Marina, 120 Texoma Harbor Drive, Pottsboro, Texas 75076.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Highport Marina, Public Water System 0910130.

Distribution Date: July 21, 2021
